Carpark Safety

The Castlemaine Steiner School carpark has been designed to maintain a safe environment for our children.

- The parking areas are located on the outside of the circle so that we can move onto the circle path and keep everyone safe and separate vehicles from pedestrians.
- Under NO circumstances should anyone cross a road, including parents, as this models incorrect behaviour that children will imitate. Even if you think you are alone little eyes will be watching.
- The speed limit inside the gate is **5 km/h** or walking pace. A rough guide is - put your car in 1 st or Low and take your foot off the accelerator completely, your car should do about 5 km/h. (Yes, it feels VERY slow) At this speed you will complete the carpark loop in 1½ mins, not too long a penalty to keep children (and you) safe.
- If you are going to the Early Childhood area you must drive around the whole circle and not short cut on either of the driveways on the right (Stop signs).
